

# FlexForm™ Thermo-Forming Bendable Hard Coating

FlexForm™ is the **tack-less** hard coating PMMA/PC, PMMA/ABS, PC, and PET substrates to be thermally formed (>200% elongation) with bent, curved, and complexed films or sheets. Thermally formed film is UV or thermally cured to provide a hard surface on the forming products.

**Applications:** Automobile **bended/curved** interior or exterior products

## ■ PMMA/PC (UV curing)

- Good adhesion/high hardness (H~3H @10mm coating thickness)

## ■ PMMA/ABS (Heat curing)

- Good adhesion/high hardness (H @20mm coating thickness)

200% Elongated  
Hard Coated Product
